

WENDY SAVAGE PHOTOGRAPHY AND DESIGN

WENDY SAVAGE PHOTOGRAPHY AND DESIGN

A photograph of a dark interior space. A window with a grid pattern is centered on the wall. A small, round, dark table with a white top is in the foreground. A beam of light from the top left illuminates the wall and the window.

Gaudi, throughout his life, was fascinated by nature. He studied nature's angles and curves and incorporated them into his designs. Instead of relying on geometric shapes, he mimicked the world around him and humans grow and stand upright! The hyperboloids and paraboloids he borrowed from nature were easily related to the steel rods and allowed his designs to resemble elements from the environment.

antoni gaudí i cornet

25 June, 1852-10 June, 1926

sometimes referred to by  
the Castilian translation  
of his name,

antonio gaudi was a catalan  
architect who belonged to the  
modernisme or art nouveau  
movement and was famous  
for his unique style and  
highly individualistic designs.
